

Dissection of Frog

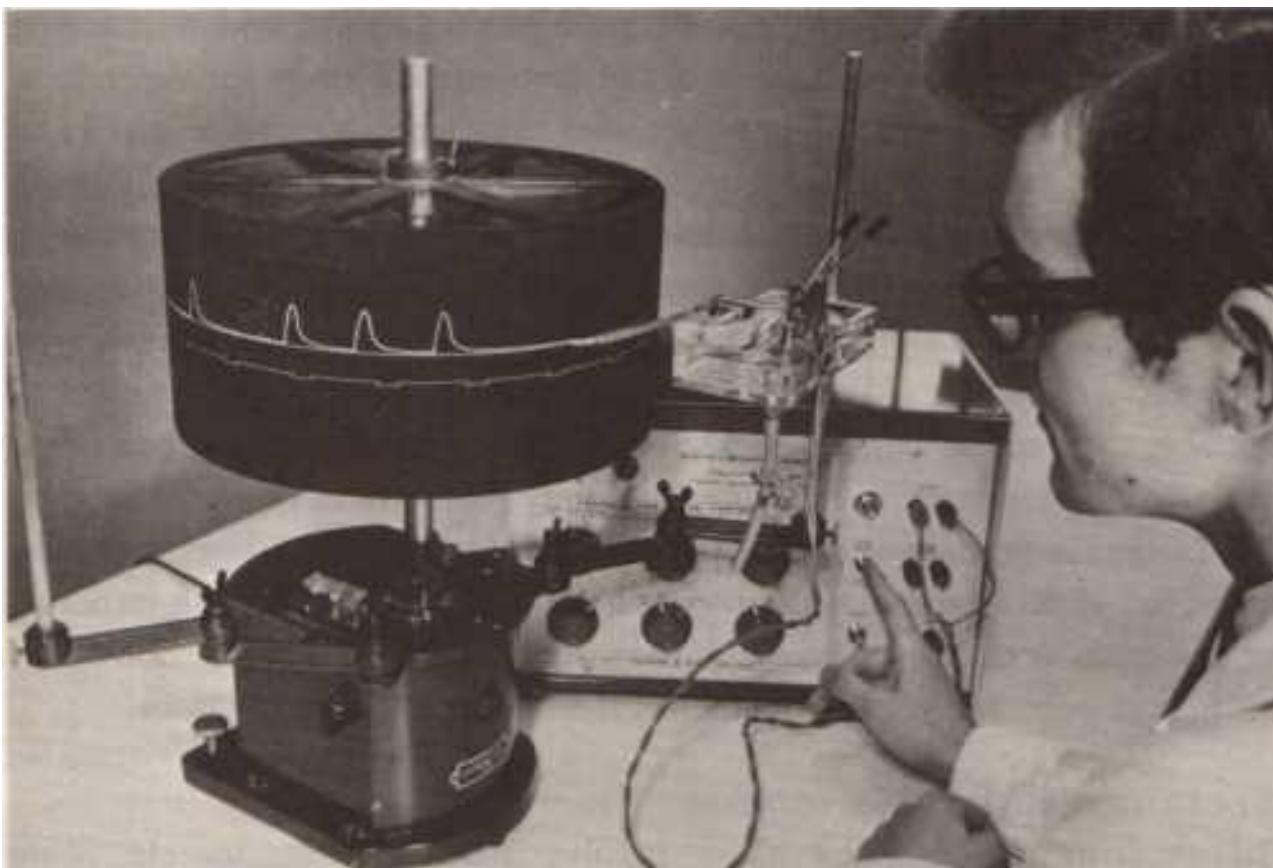

Kymograph

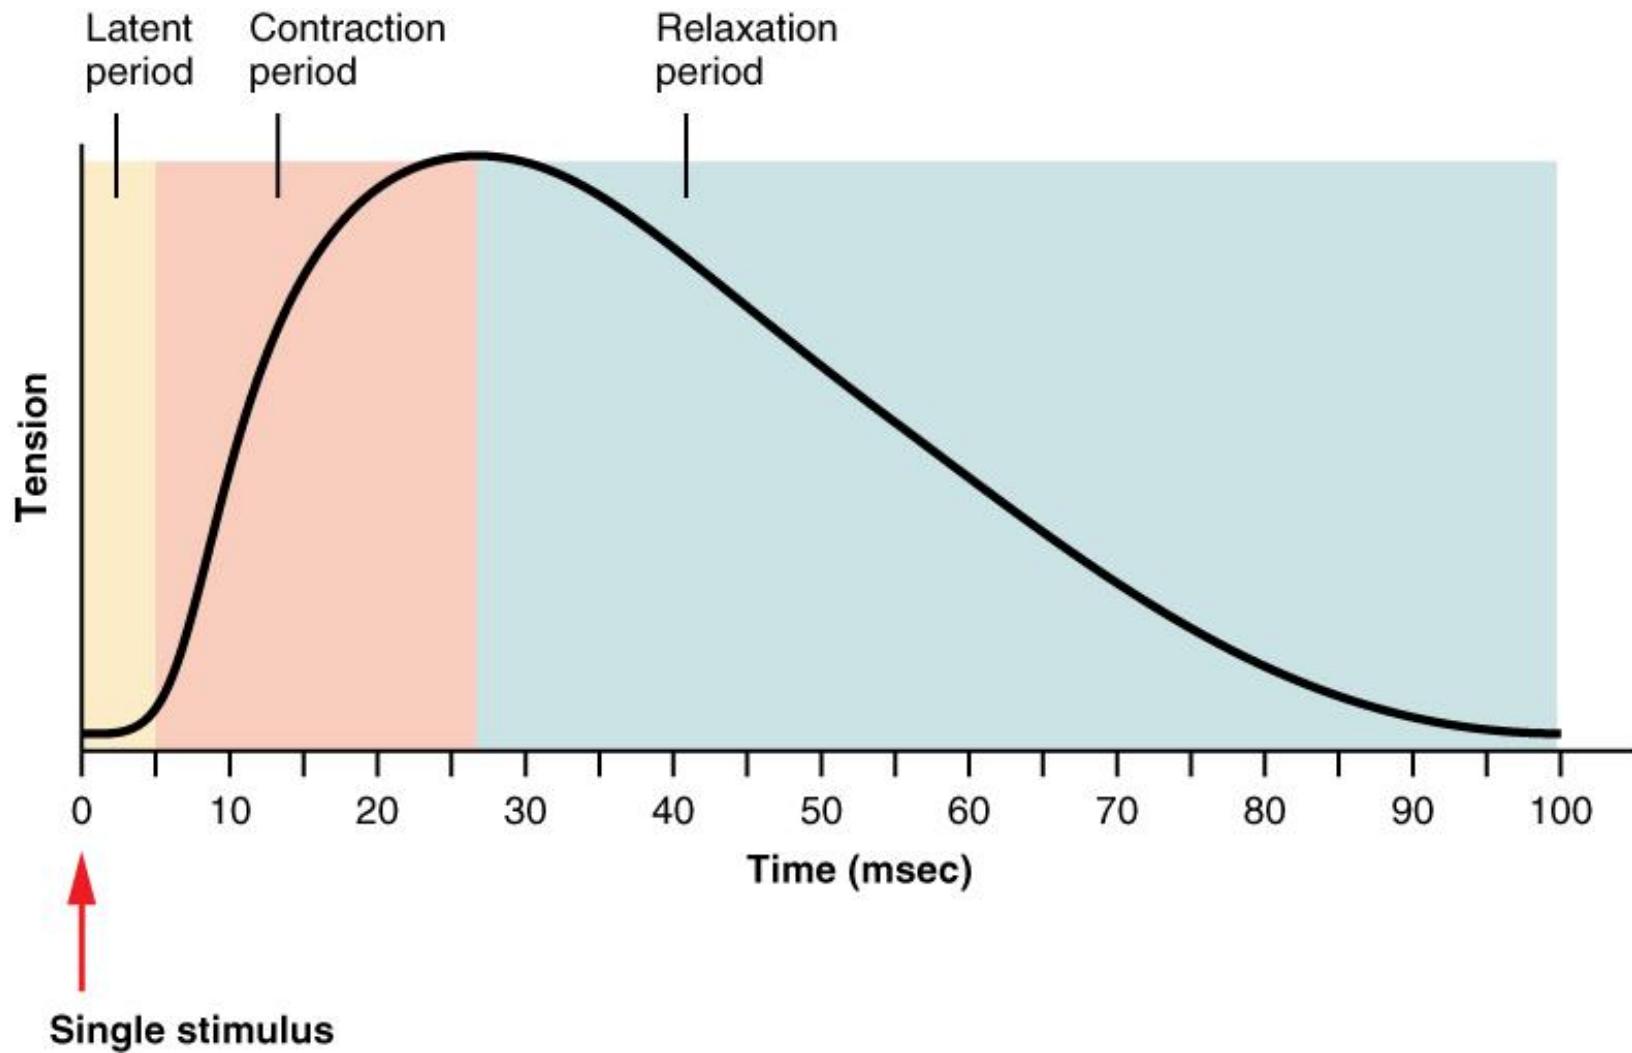

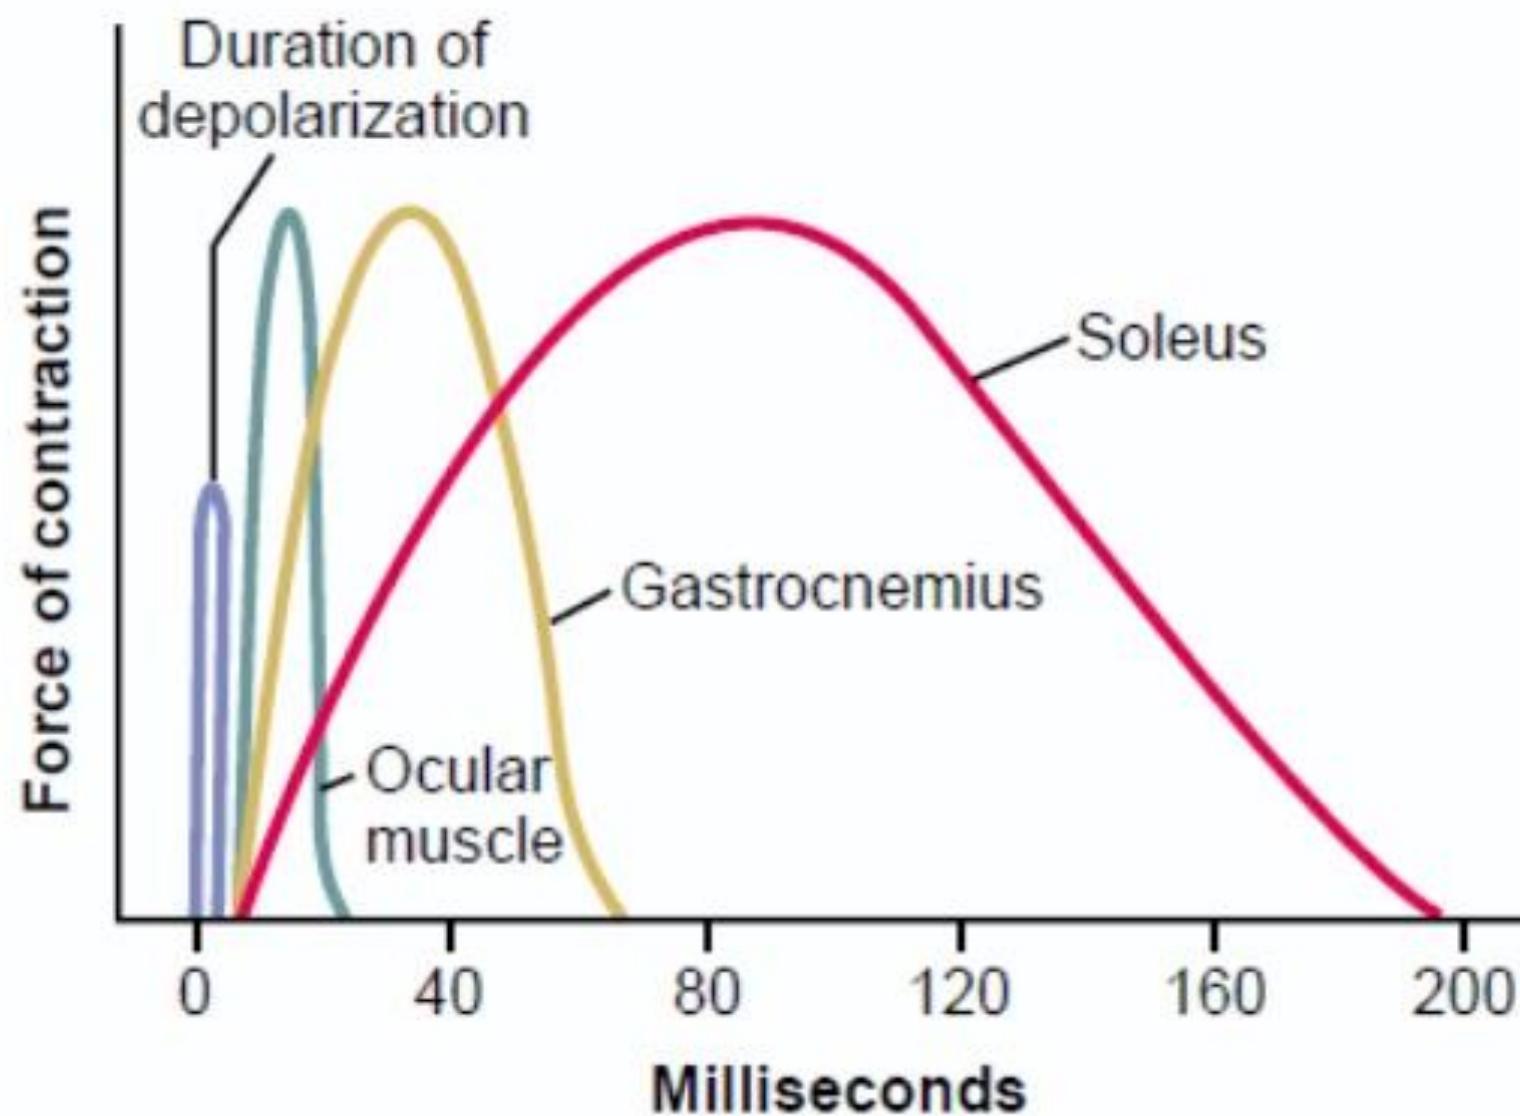

Stimulator

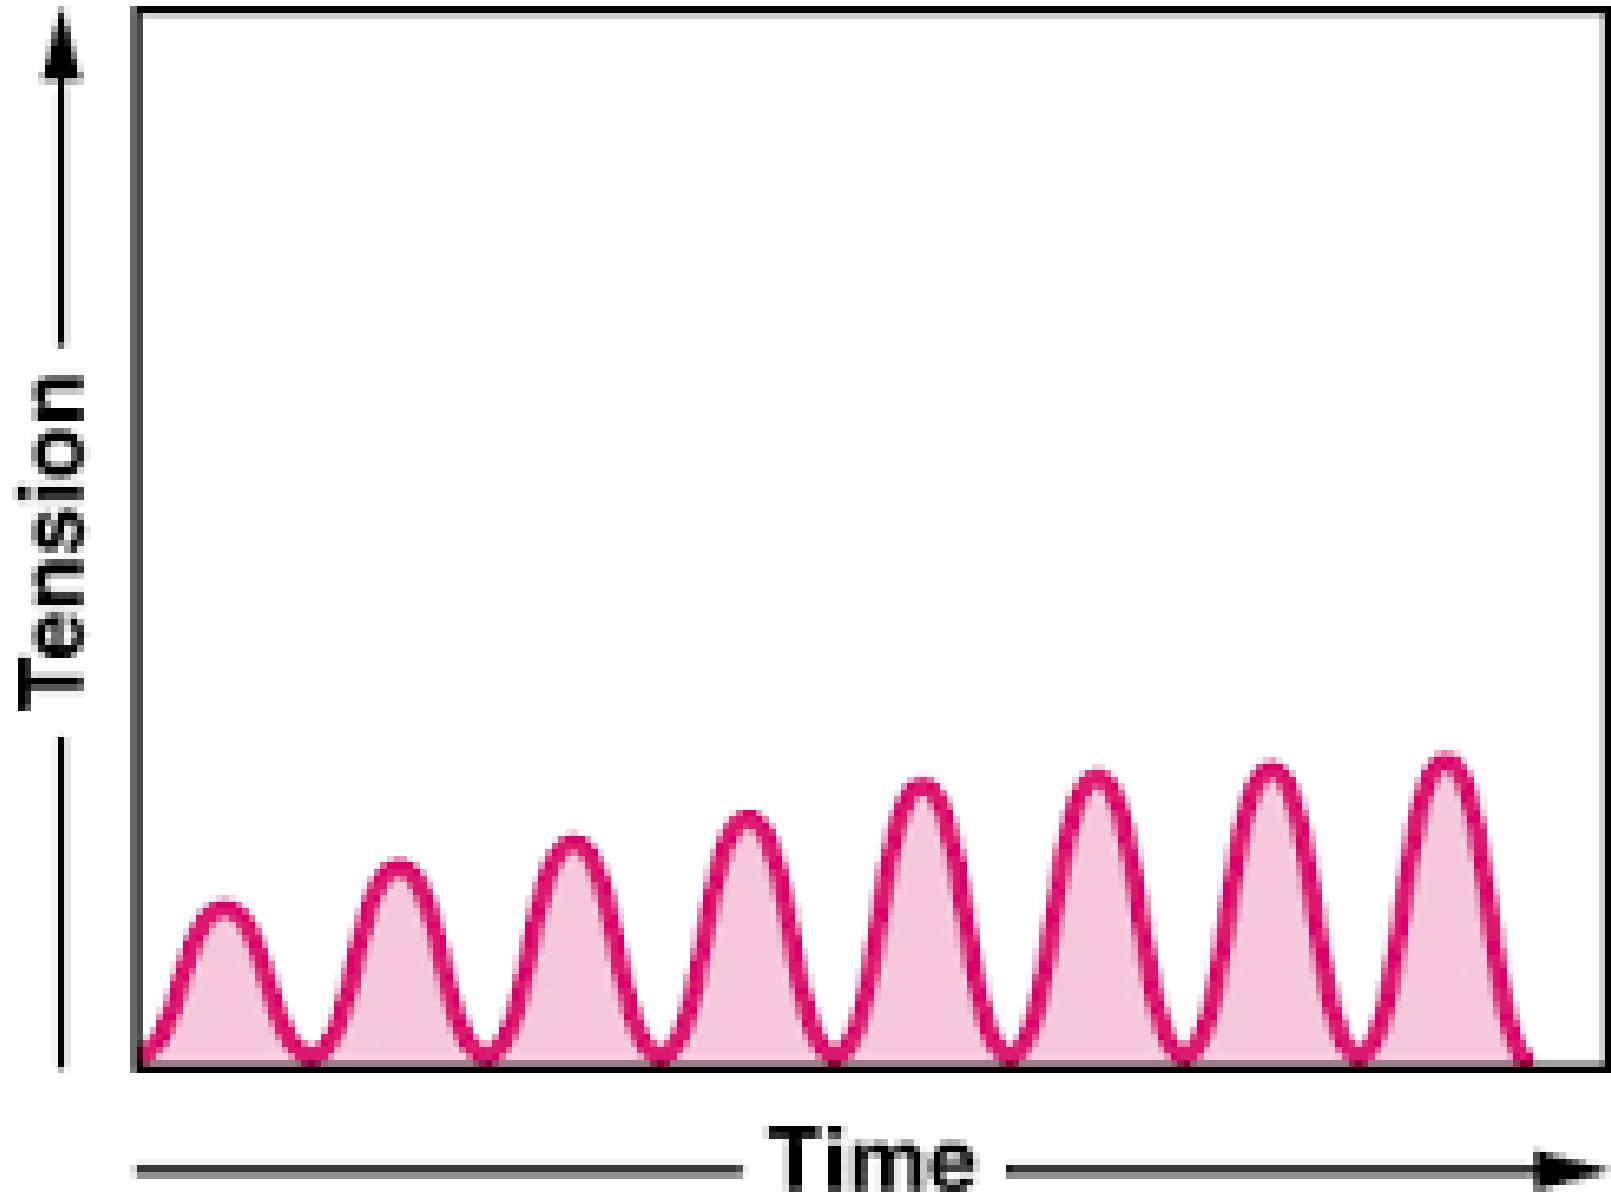

Experimental Setting

Recording of Simple Muscle twitch

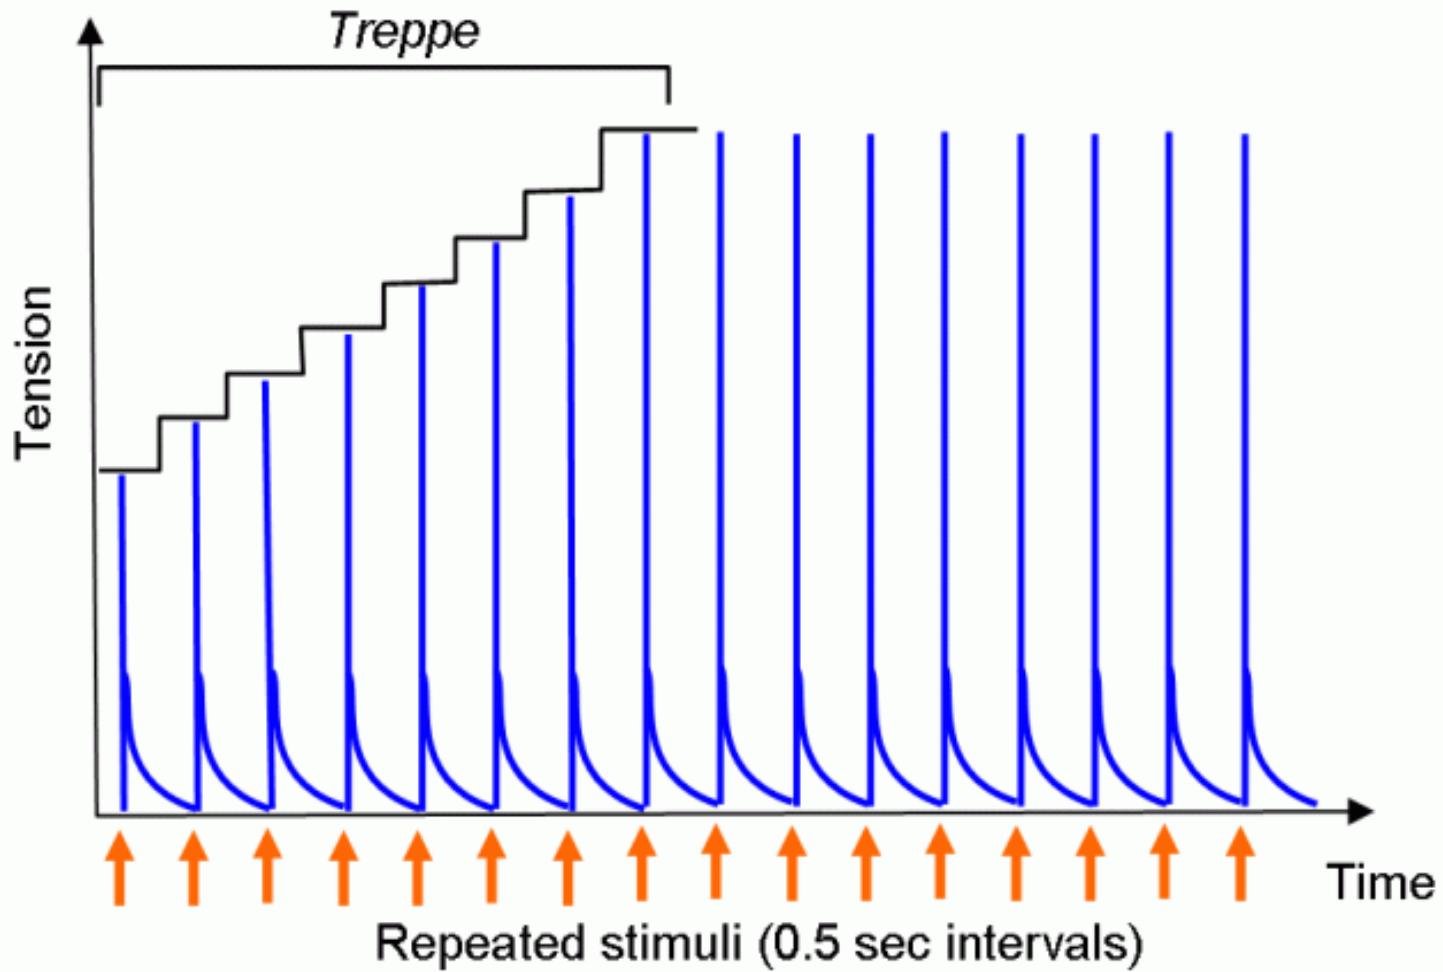

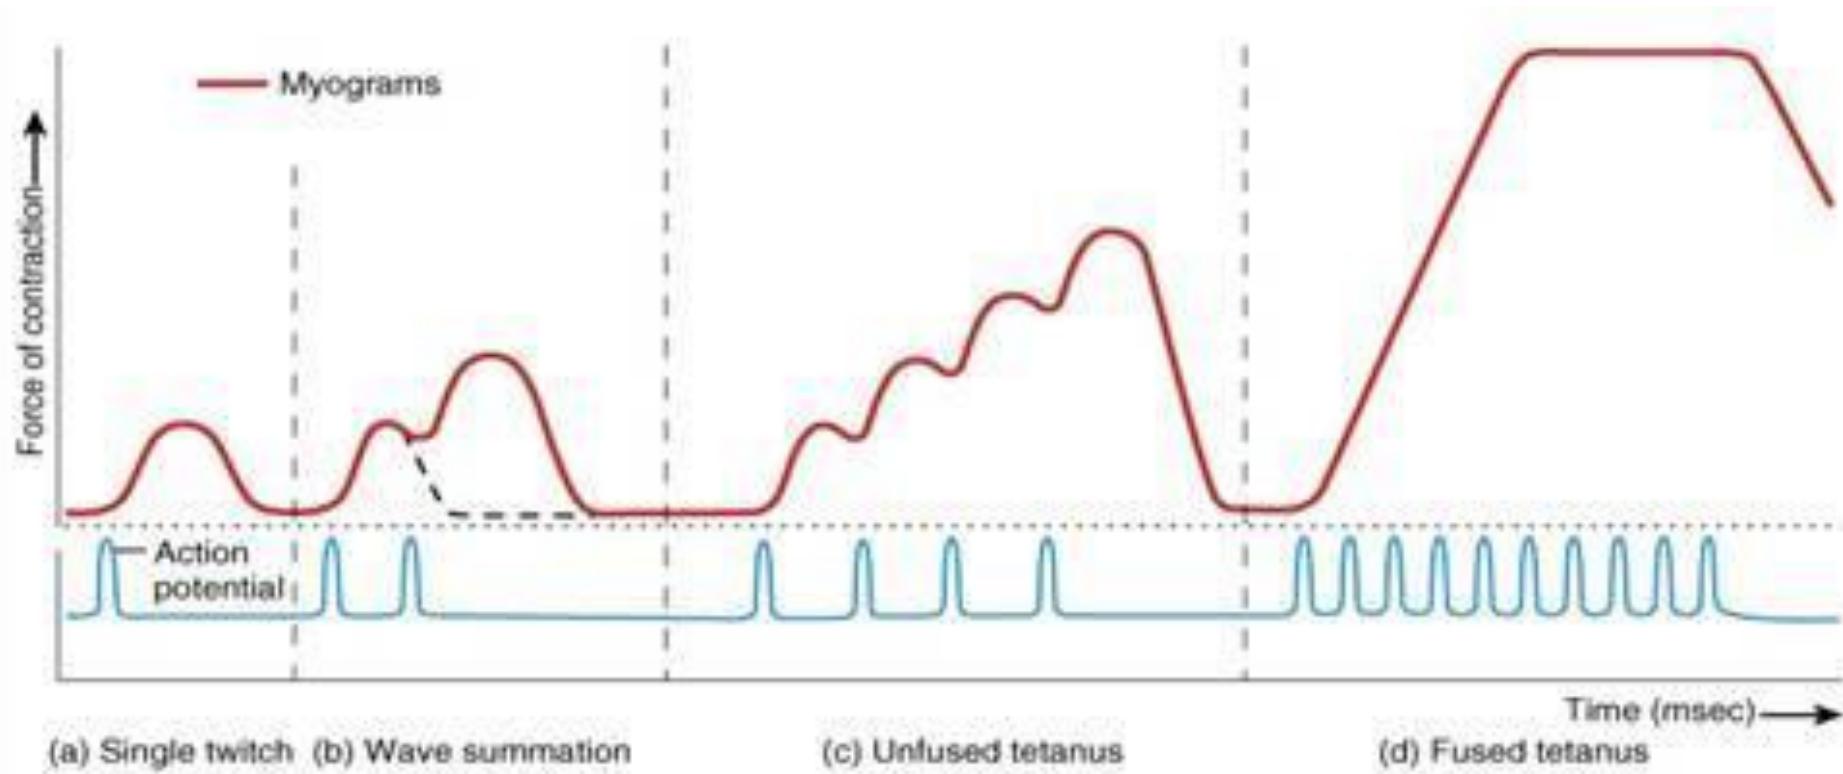

Treppe

Treppe

Summation

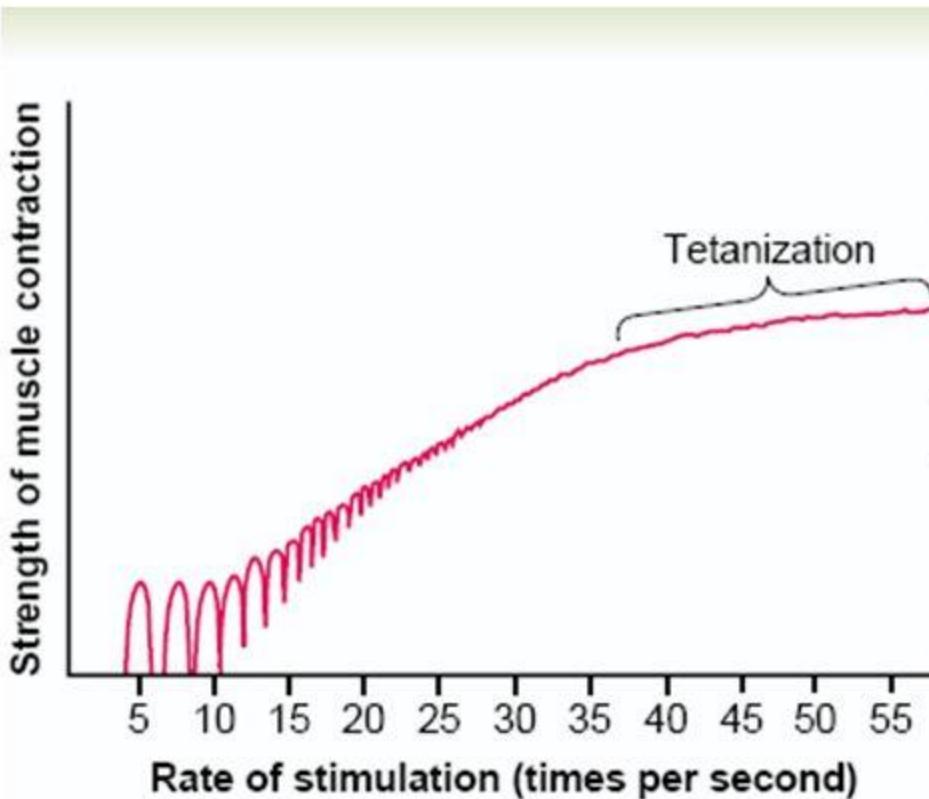

(a) Single twitch (b) Wave summation

(c) Unfused tetanus

(d) Fused tetanus

Summation of contractions

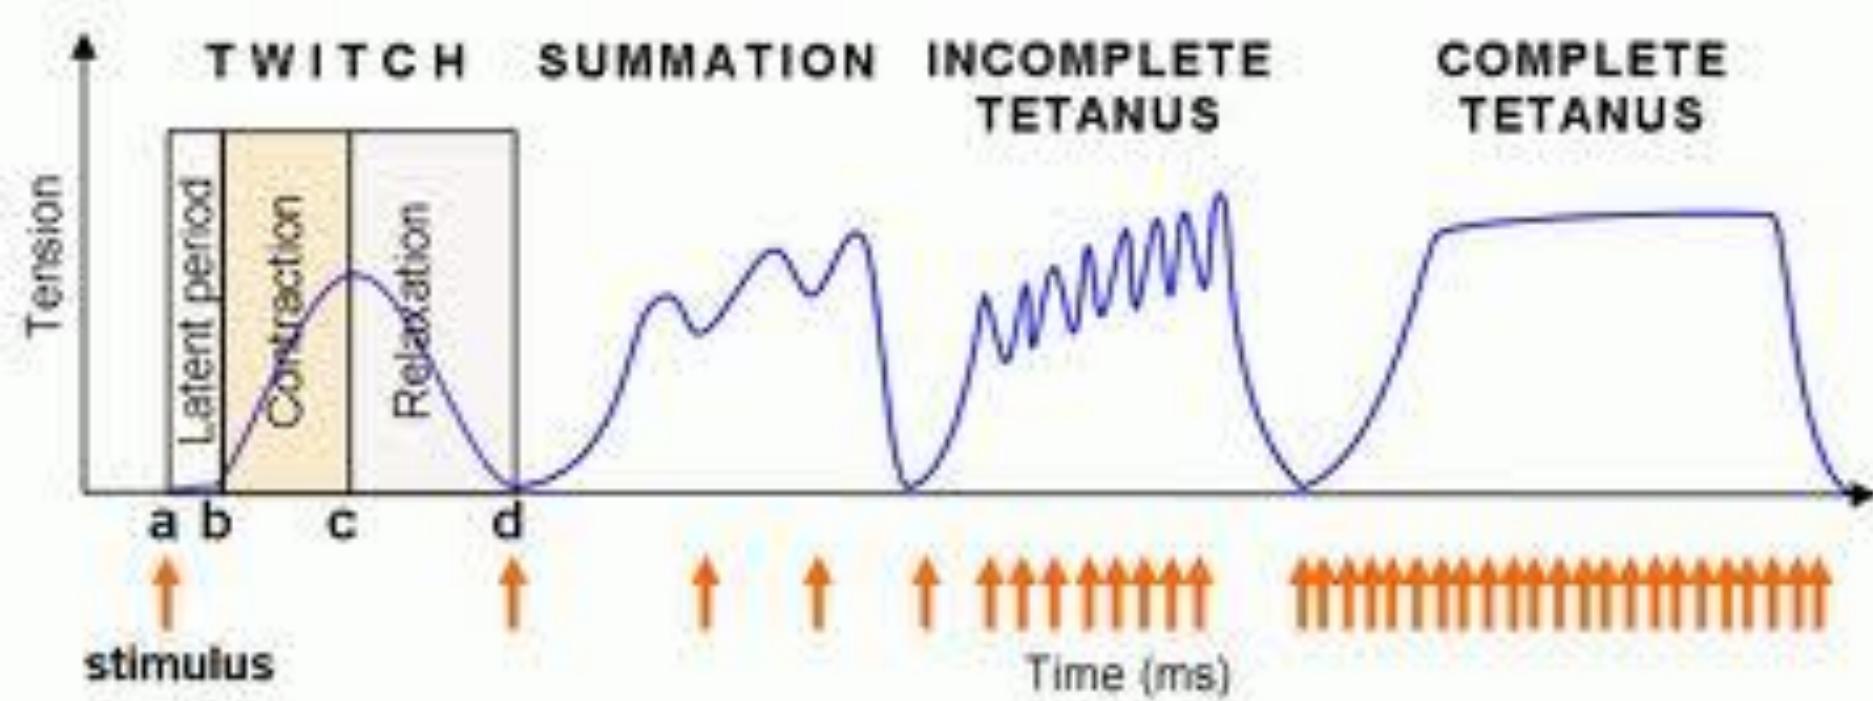

(1) by increasing the number of motor units contracting simultaneously, which is called multiple fiber summation,
(2) by increasing the frequency of contraction, which is called frequency summation and can lead to tetanization.

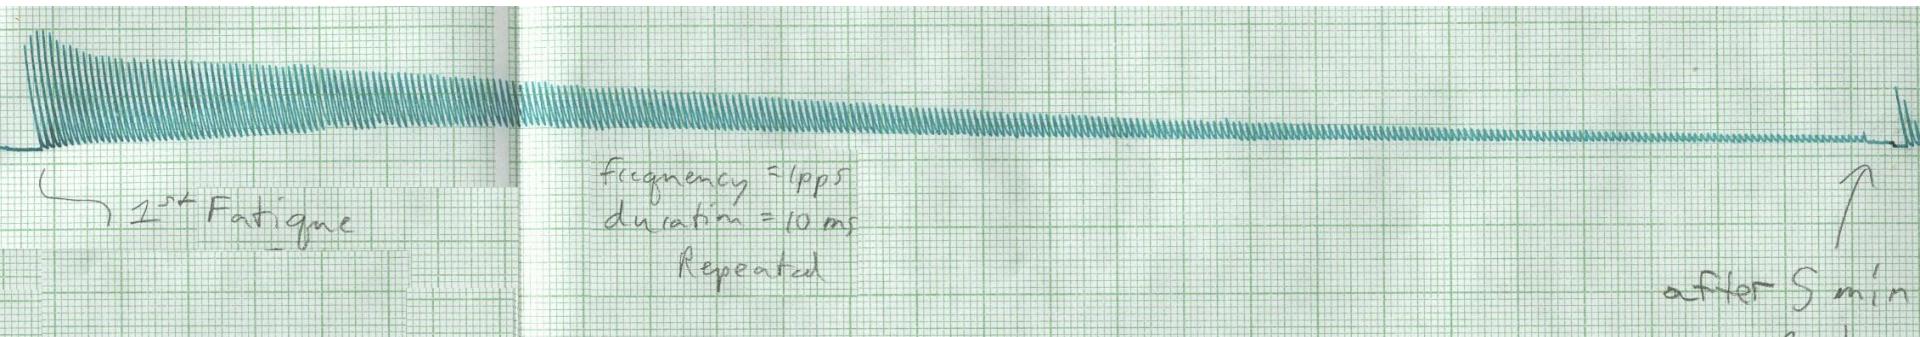

➤ Changes in Muscle Strength at the Onset of Contraction—The Staircase Effect (**Treppe**).

➤ **Skeletal Muscle Tone**: muscle spindles role

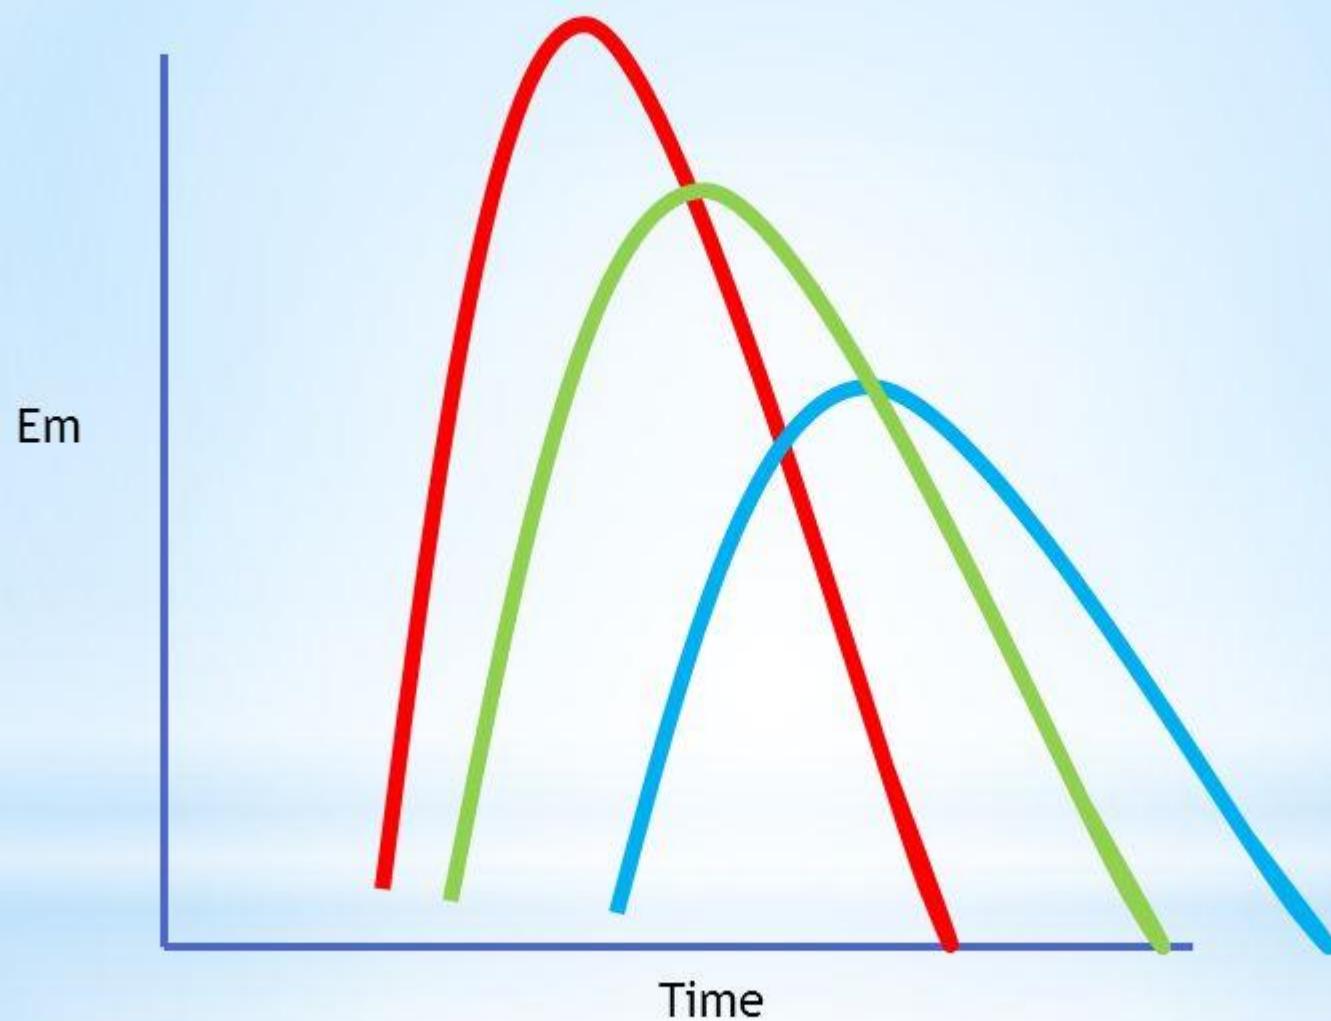

Muscle Fatigue: depletion of muscle glycogen, diminish of transmission of the nerve signal through the neuromuscular junction

Muscle Fatigue

Effect of Temperature on Simple Muscle Twitch

Links to Labs

- **Practical Nerve and Muscle Physiology:**
- **Learning objectives:**
- Recording of muscle mechanics in Physiology labs:
- Simple muscle twitch (SMT)
- Effect of Temperature on SMT
- Treppe phenomenon
- Summation:
- Tetanization
- Fatigue

Do the experiment by yourself ???

- Go to the link below and change the number of stimuli and see recordings of twitches.
- Try to get Summation, Tetanization and Fatigue **if the link is opening.**
