Dear Abdallah,

1. Yes you need to know definitions of tachyphylaxis, idiosyncratic drug response, pharmacoepidemiogy
 2. No names are required Except for drug drug interactions which I emphasized about.
 3. I will have 60% of Exam questions and Dr. Hamzeh will have 40%.
 4. There will be very simple calculations that do not require the use of a calculator.
 5. You are required to know everything that I talked about in class and everything in the slides.
- You can also use the book as a reference to cover the topics that were discussed if you would like.

Good luck in your study and Exam .. Just relax don't overthink the questions

Please let me know if you get my response.

regards,
