

Behavioural

- The movements you control and do in conscience are \rightarrow voluntary.
- The system most involved in internal body functions is \rightarrow ANS.
- True:
 - 7% of it handed are Lt. Hemisph. ^{dominant} \uparrow
- Of telencephalon components:
 - Amygdala.
- True:
 - Ligand gated channels are exposed to the extracellular transmitters.
- Not a function of limbic sys: filtering, formation
- When is slow wave sleep III + IV most reduced? \rightarrow Elderly.
- True about Sleep walking:
 - poor recall of events.
- Not true about Sleep apnoea:
 - Decreased mortality
- U see movie screen as rectangle but in retina it's triangular:
 - Shape constancy
- U know that the red shirt will stay red in different lighting.
 - Perceptual constancy

- multicomponent, complex that drives u to act ..
an emotion -
- Not included in descriptive psychology.
Preconscience.
- True about Dr. patient relationship.
It affects prognosis -
- Minor problem in adolescence:
Stay out late on weekends.
- True about changing attitude:
Source of persuasion imp. ~~is~~
- False: of the pt.
Anxiety ↑ doesn't affect compliance
- Not imp. in placebo effect:
size of the tablet
- True about placebo effect:
Expectation is imp. to cause an effect.
- Doesn't occur in stress:
Lymphocytosis -
- Not a difference between cultures..
attachment behaviour.
- Wrong about intelligence.
[I don't know the key answer]
no difference intraracially OR environment has a significant effect

- a Delusion:

"I think what's happening to me is due to spirits, Jin"

- Hallucination:

"while I was driving, I heard two people talking, but when I looked nobody was there."

- Overlapping bin objects so they appear near to each other → Interposition.

- Wrong:

not sure: it's right to give a child a chocolate bar after the end of a temper tantrum.
OR Genes are the most imp. factor that affect behaviour.

- True:

Reward is most effective when given immediately after the behaviour

- Not a thinking disorder:

thought echo

- Not included in dynamic psychopathology
Problem solving.

- True about dynamic psychopathology:

Studying the pt. present by exploring their past.

- BDZ action on → GABA funxn.

- "GNITTEGROF", easy to be remembered if u notice that it's "FORGETTING" written from the last letter..

this is called:

Digit span (not sure)

- True about gender and sexuality:
women are more sensitive to emotional infidelity.

- One is an extrapyramidal side effect of chlorpromazine.

Tardive dyskinesia.

- therapeutic index is:

median toxic dose / median effective dose

- a feeling that makes u think of subsequent events as uncontrollable and uncertain.. (not sure)

choices were:

anger, fear, anger + fear, Happiness, Happiness and anger..

- True about personality:

Objective tests tap the conscience.

- Who is most involved in S-R perspective?

Pavlov.

- NOT a "mood and affect" disturbance.
perseveration.

- The view that considers Human born with what he needs to know (Genes) - nature view.
- The Background and figure perception is the view of: Gestalt psychologists.
- Wrong: Separation anxiety in 4 y old is rare.
- in intuitive theories we use: informal scientific processes.
- Wrong about intuitive theories: 1st information we receive doesn't influence our schemes formation.
- Wrong about attributions: attribution is the 1st information we receive that is most effective on our impressions.
- Not of normal grief stages: Repression
- Doesn't affect the normal grief rxn: Age of the deceased.
- Wrong about antenatal period: 23m → sucking reflex.
- True: about communication Nonverbal communication is more truthful than verbal.

Behavioural Quiz

- Wrong statement:

Obese people are more responsive to smell of food.

- True:

physical activity is imp. for obese people to lose weight

- A question about problem solving -

- K complexes in \rightarrow stage II NREM.

- In awake state $\rightarrow \alpha + \beta$

- True: nonverbal communication is most trustful.

- Distance in meetings is \rightarrow --

- Antiadrenergic side effect: postural hypotension.

- Cheese rxn. is a side effect of MAOI

- Dose response curve is: ...

- all are psychological defence mechanisms except \rightarrow reactivation

- All from problem solving except: Avoidance.

Behavioural mid

- All are factors that moderate stress except: Gender.
- The process of translating the information we receive and storing it is: Encoding.
- Working memory stores: 7 ± 2 items.
- True about figure and ground:
we see two views but not simultaneously
- when you see people ^{standing} on it. as one grp and those on rt. as second group this is called \rightarrow law of proximity
- A question about social learning theories.
- True about attitude change:
Source of persuasion has a great effect
- Doesn't differ b/n cultures:
Brain structure.
- Not in WAIS test: concentration
- True about intelligence:
it has a genetic basis.
- Scientist of psychoanalysis:
Sigmund Freud.
- True:
Freud \rightarrow Ego, superego, Id.
- Key hormones in Gender and sexuality:
Androgens.

- Not of limbic system:
caudate

- functions of Hypothalamus, except:
Gait steadiness.

- Wrong:

NT's manufactured at R.

- Prosencephalon, except:
cerebellar hemisphere.

- Concordance can be measured through:
difference b/n MZ + DZ

- Autosomal dominant:
Huntington's.

- Money and good grades:
2° reinforcers.

- False:

Instinctual behaviour is mostly acquired

- False:

Behaviour is mainly conscious.

- False:

separation anxiety rare at 3 y old.

- True about cognitive development:

Preoperational → egocentric thinking.

- False:

children at 9 y old can compare
2 theories.

- Social withdrawal at 13 is worrying
↑ (true)

- S-R

Behavioural perception -

- True:

Aversive conditioning explains anxiety

- Wrong:

When u give a child a gift after doing a good behaviour is called a bribe.

- Nurture view definition
answer is nurture view.

- In theory that T.V violence has a cathartic effect, watching violence movies leads to
→ ↓ aggression

- Psychology is:

Science of mental processes and behaviour

- True:

observation can change behaviour

- Remembering starts at:

3y.

* Dr. Abd-ALMonaf :-

① Sleep spindles are associated with one of the following :-

- stage I
- ✓ - stage II
- stage III
- stage IV
- ~~REM~~ REM sleep.

② all of the following are results from sleep deprivation Except :-

- impaired memory consolidation
- interpersonal problems.
- ✓ Hemostatic restoration of brain tissue.
- scholastic deterioration.

③ which one of the following EEG recording associated with wakefulness.

- mixed alpha & beta.
- mixed alpha & theta
- " " " delta
- " beta & theta.
- " " " delta.

④ one of the following is not involve in try insomnia :-

- cataplexy.

⑤ which one of the following, polysomnography can't record :-

- cardiac rhythm.
- sleep architecture.
- ✓ penile tumescence.
- eye movement.

* Dr. AL-Azzawi :-

⑥ all of the following are psychotropic drugs Except :-

- antidepressant.
- anti-psychotic
- ✓ - alpha recep. blocker
- mood stabilizer.
- Anti-anxiety

3) what from the following is the mechanism of anti-psychotic drugs:-

- D2 receptor antagonism.

8) what is true regarding Dose response curve?

- the same as therapeutic index.
- is that drugs must be given at effective dose.
- ✓ the plot of concentration ratio of effect of the drug.
- the maximum response produced by administration of " "
- the relative dose to achieve a specific effect.

9) ~~one~~ one of the following is antiadrenergic effect of chlorpromazine:-

- dystonia
- Ammenhrea.
- constipation
- ✓ postural hypotension
- blurring of vision

10) one of the following is not an adverse effect of tricyclic:-

- weight gain
- blurring of vision.
- ✓ cheese rxn.
- urinary retention
- constipation.

11) Dr. Radwan Bani Mustafa:-

11) what is the true statement about sick-role:-

- ✓ sick role not limited to person.
- is related to positive social behavior.
- is explained by the psychoanalytic schools.

12) what is false about obesity?

- obese & non-obese are different in response to food cues.
- body energy expenditure is important in weight control.
- obesity is due to unresolved psychological issues.
- ✓ obese patient are highly responsive to food smell
- there is no specific personality type for obese ~~the~~ persons.

13) which is true about food intake :-

✓ Food intake affected by social factors.

- hypothalamus is the only region that regulate it.

- amino acid concentration affect the hypothalamus. Food intake.

- people eats more at warmer environments.

14) which is false about proxemics :-

- personal space (30 - 75)

- intimate " (up to 50)

- social " (120 - 200)

- public " (300 or more)

✓ meetings are held on personal space

15) which is true about nonverbal communication :-

✓ it is more often trustful.

- mostly conscious.

- convey less than half of the message.

- paralinguage is not included.

16) all of the following are reasons to adopt sick role except :-

- secondary gain.

- experiencing true disease.

- inability to cope with stress

✓ to avoid seeking medical help.

- fear of the disease.

17) * Dr. Abd-almajeed mohammad :-

17) which is false about Aging changes :-

- visual memory affected more than auditory

- Recall = = Recognition.

- need more time to register information.

- ↓ in speed of accurate perception.

✓ problem solving not affected

(18) all of the following considered as problem solving strategies

Except:-

- ask a colleague about his opinion of the problem.
- decided not to talk with the person causing the problem.
- asking for help from sociator

(19) all of the following are defense mechanisms except:-

- denial
- regression
- reactivation
- rationalization.

(20) about aging, which sentence is correct:-

- a person 55 years old must act better than 65. one
- physical exercise improve reaction time.
- brain weight decrease by 10% at 70 years of age.
- verbal IQ decrease / show decline, more than performance IQ.

THE END

GOOD LUCK
